

Resume PreScreen

The Smart Way to Identify the Best Resumes

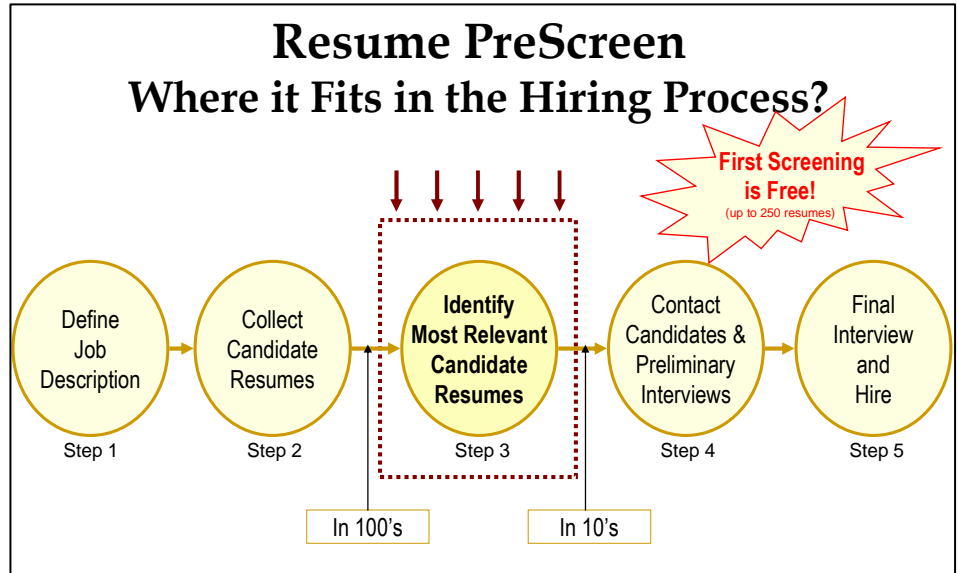

With Resume PreScreen you can,

- Save hours of tedious work
- Focus on the most relevant candidate resumes - 10's, not 100's
- Prescreen an unlimited number of candidate resumes (Efficient prescreening allows additional incoming resume processing which may otherwise get ignored.)
- Achieve consistent, reliable, and accurate results

❖ 24 to 48 hour turn-around ❖

Additional services shown in steps 1, 2 and 4 are available upon request

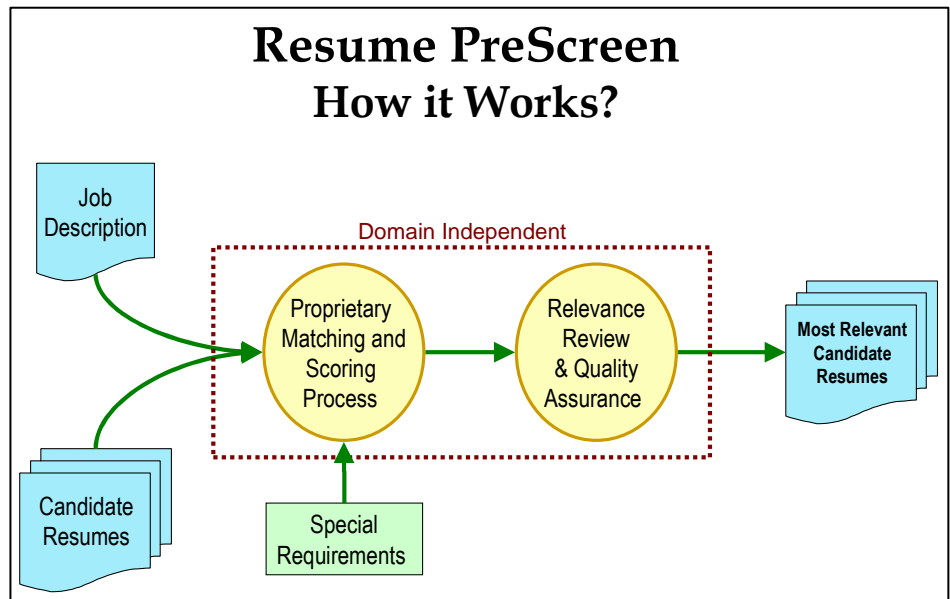

Resume PreScreen service uses a proprietary computer-based matching and scoring process with a unique combination of text mining & statistical algorithms. It looks for much more than key-word based matches, taking advantage of all the information contained in the job description and the resumes!

Resume PreScreen's engine makes intelligent use of phrases and user-provided special requirements, assigns higher matching importance where desired, followed by a proficient review to deliver high-quality results.

Test Drive Resume PreScreen

Three simple steps:

1. Provide your job description and a pool of candidate resumes electronically.
2. Provide your special requirements, e.g., "healthcare industry experience more valuable", "must have JAVA experience", "statistics", etc.
3. Receive a scored list of the most relevant candidate resumes.
